

Curso: Programação Orientada a Objetos com J ava

<http://educandoweb.com.br>

Prof. Dr. Nelio Alves

Capítulo: Projeto Sistema de J ogo de Xadrez

## Objetivo geral:

Aplicar os conhecimentos aprendidos até o momento no curso para a construção de um projeto

## System design

<https://github.com/acenelio/chess-system-design>

## Creating project and git repository

Checklist:

Github: create a new project

- o **NOTE:** choose **.gitignore** type as Java

Open a terminal in project folder, and perform the following commands:

```
git init
git remote add origin https://github.com/acenelio/chess-system-java.git
git pull origin master
git add .
git commit -m "Project created"
git push -u origin master
```

## First class: Position

Checklist:

Class Position [public]

OOP Topics:

- o Encapsulation
- o Constructors
- o ToString (Object / overriding)

## Starting to implement Board and Piece

### Checklist:

Classes Piece, Board [public]

OOP Topics:

- o Associations
- o Encapsulation / Access Modifiers

Data Structures Topics:

- o Matrix

## Chess layer and printing the Board

```
8 - - - - - - - -  
7 - - - - - - - -  
6 - - - - - - - -  
5 - - - - - - - -  
4 - - - - - - - -  
3 - - - - - - - -  
2 - - - - - - - -  
1 - - - - - - - -  
  a b c d e f g h
```

### Checklist:

Methods: Board.Piece(row, column) and Board.Piece(position)

Enum Chess.Color

Class Chess.ChessPiece [public]

Class Chess.ChessMatch [public]

Class ChessConsole.UI

OOP Topics:

- o Enumerations
- o Encapsulation / Access Modifiers
- o Inheritance
- o Downcasting
- o Static members
- o Layers pattern

Data Structures Topics:

- o Matrix

## Placing pieces on the board

### Checklist:

Method: Board.PlacePiece(piece, position)

Classes: Rook, King [public]

Method: ChessMatch.InitialSetup

OOP Topics:

- o Inheritance
- o Overriding
- o Polymorphism (ToString)

## BoardException and defensive programming

### Checklist:

- Class BoardException [public]
- Methods: Board.PositionExists, Board.ThereIsAPiece
- Implement defensive programming in Board methods
- OOP Topics:
  - o Exceptions
  - o Constructors (a string must be informed to the exception)

## ChessException and ChessPosition

### Checklist:

- Class ChessException [public]
- Class ChessPosition [public]
- Refactor ChessMatch.InitialSetup
- OOP Topics:
  - o Exceptions
  - o Encapsulation
  - o Constructors (a string must be informed to the exception)
  - o Overriding
  - o Static members
  - o Layers pattern

## Little improvement in board printing

### Color in terminal:

- Windows: Git Bash
- Mac: Google "osx terminal color"

### Checklist:

- Place more pieces on the board
- Distinguish piece colors in UI.PrintPiece method

## Moving pieces

### Checklist:

- Method Board.RemovePiece
- Method UI.ReadChessPosition
- Method ChessMatch.PerformChessMove
  - o Method ChessMatch.MakeMove
  - o Method ChessMatch.ValidateSourcePosition
- Write basic logic on Program.cs
- OOP Topics:
  - o Exceptions
  - o Encapsulation

## Handling exceptions and clearing screen

Clear screen using Java:

```
// https://stackoverflow.com/questions/2979383/java-clear-the-console  
public static void clearScreen() {  
    System.out.print("\033[H\033[2J");  
    System.out.flush();  
}
```

Checklist:

- ChessException
- InputMismatchException

## Possible moves of a piece

**Input:** a piece

**Output:** a boolean matrix of possible movements

Checklist:

Methods in Piece:

- o PossibleMoves [abstract]
- o PossibleMove
- o IsThereAnyPossibleMove

Basic PossibleMove implementation for Rook and King

Update ChessMatch.ValidadeSourcePosition

OOP Topics:

- o Abstract method / class
- o Exceptions

## Implementing possible moves of Rook

### Checklist:

Method ChessPiece.IsThereOpponentPiece(position) [protected]

Implement Rook.PossibleMoves

Method ChessMatch.ValidateTargetPosition

OOP Topics:

- o Polymorphism
- o Encapsulation / access modifiers [protected]
- o Exceptions

## Printing possible moves

### Checklist:

Method ChessMatch.PossibleMoves

Method UI.PrintBoard [overload]

Refactor main program logic

OOP Topics:

- o Overloading

## Implementing possible moves of King

### Checklist:

Method King.CanMove(position) [private]

Implement King.PossibleMoves

OOP Topics:

- o Encapsulation
- o Polymorphism

## Switching player each turn

### Checklist:

Class ChessMatch:

- o Properties Turn, CurrentPlayer [private set]
- o Method NextTurn [private]
- o Update PerformChessMove
- o Update ValidadeSourcePosition

Method UI.PrintMatch

OOP Topics:

- o Encapsulation
- o Exceptions

## Handling captured pieces

Checklist:

- Method UI.PrintCapturedPieces
- Update UI.PrintMatch
- Update Program logic
- Lists in ChessMatch: \_piecesOnTheBoard, \_capturedPieces
  - o Update constructor
  - o Update PlaceNewPiece
  - o Update MakeMove
- OOP Topics:
  - o Encapsulation
  - o Constructors
- Data Structures Topics:
  - o List

## Check logic

Rules:

- Check means your king is under threat by at least one opponent piece
- You can't put yourself in check

Checklist:

- Property ChessPiece.ChessPosition [get]
- Class ChessMatch:
  - o Method UndoMove
  - o Property Check [private set]
  - o Method Opponent [private]
  - o Method King(color) [private]
  - o Method TestCheck
  - o Update PerformChessMove
- Update UI.PrintMatch

## Checkmate logic

Checklist:

- Class ChessMatch:
  - o Property Checkmate [private set]
  - o Method TestCheckmate [private]
  - o Update PerformChessMove
- Update UI.PrintMatch
- Update Program logic

## Piece move count

Checklist:

Class ChessPiece:

- o Property MoveCount [private set]
- o Method IncreaseMoveCount [internal]
- o Method DecreaseMoveCount [internal]

Class ChessMatch:

- o Update MakeMove
- o Update UndoMove

OOP Topics:

- o Encapsulation

## Pawn

Checklist:

Class Pawn

Update ChessMatch.InitialSetup

OOP Topics:

- o Encapsulation
- o Inheritance
- o Polymorphism

## Bishop

Checklist:

Class Bishop

Update ChessMatch.InitialSetup

OOP Topics:

- o Encapsulation
- o Inheritance
- o Polymorphism

## Knight

Checklist:

Class Knight

Update ChessMatch.InitialSetup

OOP Topics:

- o Encapsulation
- o Inheritance
- o Polymorphism

## Queen

Checklist:

- Class Queen

- Update ChessMatch.InitialSetup

- OOP Topics:

- o Encapsulation
  - o Inheritance
  - o Polymorphism

## Special move - Castling

Checklist:

- Update King

- Update ChessMatch.MakeMove

- Update ChessMatch.UndoMove

## Special move - En Passant

### Checklist:

- Register a pawn which can be captured by en passant on next turn
  - o Property ChessMatch.EnPassantVulnerable
  - o Update ChessMatch.PerformChessMove
- Update Pawn.PossibleMoves
- Update ChessMatch.MakeMove
- Update ChessMatch.UndoMove
- Update ChessMatch.InitialSetup

## Special move - Promotion

### Checklist:

- Property ChessMatch.Promoted
- Update ChessMatch.PerformChessMove
- Method ChessMatch.ReplacePromotedPiece
- Update Program logic
